LinkedIn GitHub Codeforces

PROFILE

Passionate Computer Science student specializing in **Generative AI** and **Agentic AI systems** with strong expertise in **Python programming**, **LLM integration**, and **intelligent agent development**. Experienced in building **AI-powered autonomous systems**, **conversational agents**, and **workflow automation** with proven problem-solving skills through **1500+ solved algorithmic problems** and competitive programming achievements.

EDUCATION

Hajee Mohammad Danesh Science and Technology University

B.Sc (Engineering) in Computer Science and Engineering

Dinajpur, Bangladesh

2023 – 2026 (Expected)

- CGPA: 3.69 out of 4.00 (92.25%)

TECHNICAL SKILLS

- Programming Languages:** Python, C, C++, Java
- AI/ML Libraries & Frameworks:** NumPy, Pandas, Scikit-learn
- Agentic AI & Automation:** N8N Workflow Automation, Langchain, LangGraph, RAG pipelines
- Tools & Platforms:** Git & GitHub, Linux (Bash scripting), Ollama
- Core Competencies:** Data Structure and Algorithms, Object-Oriented Programming, Problem Solving

ACHIEVEMENTS & RECOGNITION

- AI Hackathon 2025:** Advanced to **Top 8 Finals** among 108 teams with **intelligent agentic AI healthcare solution**
- Competitive Programming:** **Specialist** at Codeforces (Max rating: 1477) and 3 star on CodeChef
- Mastered **1500+ algorithmic problems** across multiple platforms
- Competed in **ICPC Dhaka Regional** twice, qualified for **NCPC Final Round**, ranked **72nd among 300+ teams**
- Champion** of Rangpur Divisional Programming Contest 2024 hosted by BRUR

PROJECTS

DoctorAI - Intelligent Healthcare Agent | Generative AI, Agentic AI, Python, N8N

2025

- Developed **autonomous AI agent** with advanced reasoning capabilities for medical diagnosis using **multi-step workflow automation**
- Implemented **conversational AI system** with iterative questioning patterns and **context-aware decision making**
- Built **knowledge-based agentic system** using **prompt engineering** and **LLM integration** for intelligent treatment recommendations
- Top 8 Finalist** in AI Hackathon 2025 among 108 teams, demonstrating excellence in **generative AI** and **agent-based solution development**

GenAI Multi-Modal Chat Platform | LangChain, RAG, Python, Open source LLM | Source Code

2025

- Built **comprehensive conversational AI platform** with **persistent memory management** and **context-aware dialogue systems**
- Implemented **RAG (Retrieval-Augmented Generation)** pipeline for **PDF document interaction** enabling intelligent document querying and analysis
- Developed **multi-modal chat interface** supporting normal conversations with **long-term memory retention** and specialized **document-based Q&A**
- Engineered **vector database integration** and **semantic search capabilities** for efficient document retrieval and contextual response generation

DamaDami AI Marketplace | Generative AI, JavaScript, Google Gemini API | Source Code

2025

- Developed **intelligent pricing agent** using **generative AI** that negotiates with customers about product prices
- Implemented **LLM-powered decision system** using Google Gemini API with **advanced prompt engineering** for context-aware recommendations
- Uses **product details and conversation history** to negotiate within predefined limits using **contextual memory**

NoCheat IDE | Java, JavaFX

2025

- Engineered **secure IDE** using Java and JavaFX for Windows and Linux to prevent dishonesty in coding exams
- Achieved **100% cheat prevention** through comprehensive security implementation including secure sandbox, clipboard control, and file security
- Implemented **multi-layer security features:** fullscreen lock with disabled context switching and window minimization, blocked external copy-paste operations, obfuscated source locations, and automatic cleanup on exit
- Integrated **comprehensive activity monitoring** and logging system for audit trail and security analysis
